## *A Moment with Marty...*

**Q:** Could you please explain how the HVAC system works in the NRH?

**A: Adjusting the thermostat in the New Residence Hall**  
In the NRH the system will either heat or cool your room to the temperature you set on your thermostat. The base temperature setting for each room is 72 degrees for cooling and 68 degrees for heating and the thermostat may be adjusted up or down a maximum of 5 degrees in increments of 1 degree.

1. Press either the up or down button to open the adjustment screen.
2. Use the up or down button to raise or lower the desired space temperature settings.
3. Press the X button to return to the main display screen.

## Meet this year's Deacons

**The following students will serve as deacons for 2009-2010:** Ben Beasley, Christine Kaplunas, Cornelius Lloyd, Laura Palmer, Kristin Stroble, Ross Reddick

**What are our deacons here for?** CTS deacons are to be viewed as an extension of Student Services by providing a "listening ear" to other students. These deacons will be available as a resource to other students during their times of "transition" (i.e. at the beginning of their studies, as they approach the end of their studies, as they interact with other students, faculty, and administrators, or maybe as folks are simply trying to find the best hamburger or cup of coffee in town). Perhaps you simply need to talk with someone. It is expected that conversations with these deacons be considered confidential, except for those times when safety is considered an issue.

We ask that all please understand that these deacons also must maintain the activities of their own lives, which includes study, sleep, etc.. Respect their privacy and boundaries as much possible, especially late night (after 9:00 p.m.) and in the mornings (before 7:30 a.m.). In the case of an emergency, please contact the Agnes Scott Police Force or the Dean of Students.
